# Quick-Pick

Oasys Ltd
The Software House of ARUP

Quick-pick

The Quick-Pick menu can be used to apply functions, edit curves or change the appearance of curves.
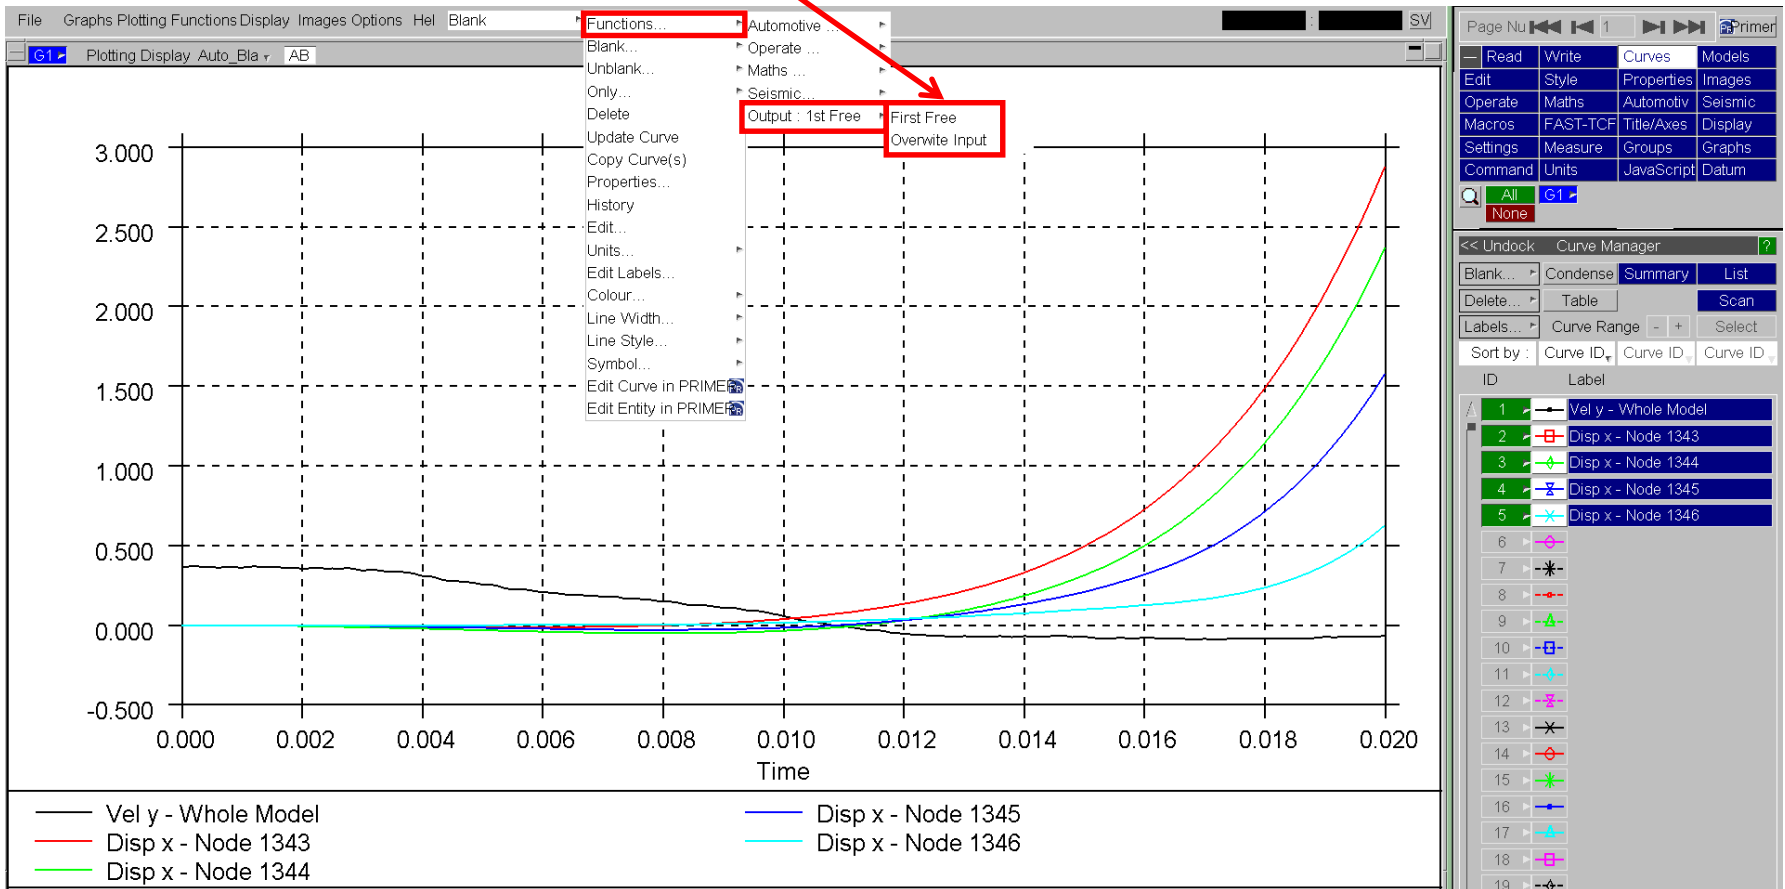

Quick-pick

Once an option has been selected, Left-Click on a curve to apply current option; or drag a box to apply the current quick pick operation to multiple curves.

Right-Click on a curve to display basic curve information, or to apply a different option.

Oasys Ltd

Functions

All of the functions available from the Quick-Pick menu generate a single output curve. This output can be set to either generate a new curve or to overwrite the input curve.
