

SIMBIO-M

TURIN, 18 and 19 June 2020

www.simbio-m.eu

We would like to invite you to participate and present your research to the SIMBIO-M 2020 conference, which will be held in Turin on 18th and 19th June 2020.

The conference will bring international participants, ranging from young researchers to industrial end-users, from numerical analysts to software developers, and from research funding organisations to medical specialists.

The objective of the conference is to share and explore findings on numerical analysis techniques and mathematical modelling tools in various fields of **BioMechanics**, **BioMedical**, **BioMaterial** and **BioMedecine**.

While the conference will concentrate mainly on the developments and applications of simulation models, novel analysis techniques (such as stochastic modelling, optimisation based model identification solutions, and machine learning techniques for predictive modelling implementations), it will also promote the state of the art in bio-sciences and bio-technologies.

SIMBIO-M will cover amongst other research areas:

- **Topic 1: “Machine learning & Artificial Intelligence”**
- **Topic 2: “Impact Biomechanics, Automotive Safety”**
- **Topic 3: “Design, simulation and optimisation”**
- **Topic 4: “Advances in Human Modelling”**

Please submit your research paper at: <https://www.simbio-m.eu/paper-submission/>

SIMBIO-M is also great opportunity to present your company and products, make new contacts, and develop new businesses.
